

Contract for PhD position in Vaccine delivery

We are looking for candidates interested in a PhD position to join the groups of [Prof. MJ Alonso](#) and [Prof. N. Csaba](#), at the Center for Research in Molecular Medicine and Chronic Diseases (CIMUS) of the University of Santiago de Compostela (USC), Spain.

What we offer

- Joining an international research project in vaccine delivery.
- Learning and applying advanced technologies for *in vitro* pharmaceutical development, cell culture, and participate to *in vivo* assays, within a framework of national and international collaborations.
- Joining the official Doctoral Program of the USC "[Investigación y desarrollo de medicamentos](#)" that complies with the highest quality standards.
- Contract support for your first year, which may be followed by additional Ph.D. fellowship support.

What we are looking for

- Official **Master Degree** (or equivalent) in Pharmacy, Biotechnology, Biomedical Engineering or Biomedicine, that gives access to a doctoral program.
- **Excellent academic track record**
- Interest for an international research stay of at least 3 months will be positively evaluated.
- Previous experience in laboratory activities and/or writing scientific documents will be positively evaluated.
- Good level of English is a must.

Contact

Please send the following documents to Noemi Csaba (noemi.csaba@usc.es) and Purificación Domínguez (purificacion.dominguez@usc.es) with the subject "**PhD position offer**"

- CV (pdf) highlighting your merits
- Copy of your academic track record
- Reference letters or contacts (when available).

Application deadline: October 15th, 2023
